Oudom Munint Pannha

Software Engineer, Productivity Development Solutions

Newcastle, NSW

oudommunint@gmail.com

0478753033

Software Engineer with 3 years of experience developing robust web mobile and console applications using the .NET ecosystem, including Blazor WASM, ASP.NET, .NET MAUI, and .NET Core RESTful APIs. Skilled in C#, JavaScript, T-SQL, with experience in frameworks like React and Bootstrap. Adept at version control, CI/CD pipelines, and structured workflows using GitHub and Azure DevOps. Experienced in agile development, collaborating in cross-functional teams, and contributing to open-source projects to drive innovation and efficiency.

Work Experience

Software Engineer
Productivity Development Solutions

August 2022 to Present

- Upgraded and maintained PDS's asset management web and cross-platform mobile apps.
- Developed and integrated RESTful APIs; tested endpoints using Postman.
- Translated complex ideas into high-quality wireframes and mock-ups.
- Implemented modern, responsive designs with clean and efficient code.
- Optimized and upgraded the frontend stack for better UI, UX and performance.
- Led a cross-functional team, handling code reviews, sprint planning.
- Designed and managed CI/CD pipelines in Azure DevOps for seamless releases.

Jr. Software Engineer
Productivity Development Solutions

February 2022 to August 2022

- Designed, developed, and launched PDS Code's website, which put the company on the map and ledto their first commercial project.
- Improved blog visibility and engagement by 50%.
- Improved site performance by 70% reducing load times and resource intensity.
- Improved SEO by 200% leading to more traffic.
- Developed user interfaces that are accessible, responsive, functional and modern to ensure consistent user experience across all devices.

Jr. Web Developer
Studio Zed

November 2021 to February 2022

- Delivered two successful projects for Studio Zed and its clients.
- Built modern, responsive, and accessible UIs for a seamless cross-device experience.
- Translated stakeholder ideas into functional products through close collaboration.
- Communicated complex development concepts effectively to non-technical stakeholders.
- Implemented CI/CD pipelines with GitHub and Netlify for streamlined deployment and updates.
